

arris¹ series

By illuminating the massive ceiling structure, the designer created a dual purpose lighting solution.

- ambient illumination of the interior space
- luminous accent at each beam draws the eye up toward the dramatic and intricate arched ceiling and artwork
- minimalist design integrates into architectural environment
- custom mounted directly to beam
- spans beam length
- luminaire size is proportioned to beam dimensions
- single T5HO • 1-7/8" x 2-3/4" housing
- 60% recycled aluminum housing
- low v.o.c. powdercoat finish color matches structural beams
- project: progressive medical center, columbus, oh
- architect: design collective, inc., columbus, oh
- lighting design: gary steffy lighting design, ann arbor, mi
- photography: studioHIO, michael houghton, columbus, oh
