

INSTALLATION STEPS

ATTENTION: Risk of fire and electrical shock - fixture to be installed by qualified contractor according to local codes and ordinances

- 1** [A] - Insert acoustic panel grooves located on the bottom of each acoustic panel inside the channels on the fixture's body.
- 2** [A] - Fold acoustic panels and insert the grooves in the top side channels.
 [B] - Insert locks in between the folded acoustic panels, teeth should be facing downwards. Push the locks towards the housing until they are snapped into position. Repeat on each side for a total of 4 per fixture.
 [C] - Ensure that locks are secured in place.
- 3** **FOR ROWS:**
 [A] - Use positioning brackets to align acoustic panels. Positioning brackets only applicable on middle sections of rows (Y) or on end (Z).
